

Cancer Research Malaysia

JOB TITLE : Post-doctoral Scientist for Cancer Immunology & Immunotherapy Unit
LOCATION : Cancer Research Malaysia Office, University Malaya
REPORTING TO : Head of Cancer Immunology & Immunotherapy Unit
Date : As soon as possible

SCOPE / PURPOSE OF JOB

The Post-doctoral Scientist will assist the head of unit to establish research programs that are relevant and internationally competitive. The scientist will involve in immunogenomics analysis to identify differentially expressed genes that can further correlated to immune status, and shortlisted potential candidates for the development of novel immunotherapy. Moving forward, the scientist is expected to design both in vitro and in vivo experiments to evaluate potential immunotherapeutic targets and ensure the data generated is aligned with both publication and regulatory standards. In addition, he/she is responsible to ensure the team stays up to date with cutting-edge technologies and research publications.

Together, this program will enable the active development of innovative immunotherapies and improve our understanding of the immune regulation of cancer patients.

QUALIFICATIONS

- PhD in immunology or cancer biology
